

REMARKS

This Amendment is being entered in response to the Office Action of September 22, 2004. In this Office Action, the Examiner issued a Restriction Requirement. On October 29, 2004, a Notice of Non-compliant Amendment was
5 mailed which noted that the full text of the withdrawn claims was not presented. The present copy of the previous amendment remedies this situation.

1. Restriction and Election

10 With regard to the Restriction Requirement, the applicants elect group III (claims 152-228) with traverse.

Applicants believe that groups III (claims 152-228) and IV (claims 229 and 230) should be examined together. Both sets of claims are directed to a process for producing imaged substrates, and it is unclear why the Examiner has classified them differently. The Examiner has classified group III in class 101
15 (Printing) subclass 483 (Processes). The Examiner classified group IV in class 400 (Typewriting Machines), subclass 76 (Including Control of Format by Programmed-Control-System). It is unclear why group IV is not also categorized as a printing process (101/483). The claims found in group IV clearly are a printing process.

20 Furthermore, applicants respectfully submit that the examination of a total of three independent claims does not place an undue burden upon the Examiner.

For similar reasons, applicants also disagree that groups V, VI, and VII should be subjected to a restriction requirement. However, the applicants have withdrawn the claims from the present application so as to expedite the
25 prosecution of the claims at hand. Applicants specifically wish to retain their right to argue against such a restriction in a future continuation or divisional application.

For the aforementioned reasons, applicants elect group III, but respectfully request that both groups III and IV be examined in the current application.

30

2. Amendments to the claims

The claims of group III and group IV have been amended so as to assist the Examiner in the evaluation of the claims.

During a review of the claims as filed, it was discovered that claim number "208" inadvertently appeared twice. The amendment to the claims that is enclosed with this response corrects this numbering error. In addition to the numbering errors, various other typographic errors have been corrected. All changes are shown in the enclosed amendment.

3. Amendments to the Inventorship

In compliance with 37 C.F.R. 1.48(b) we hereby provide

(1) A request, signed by a part set forth in § 1.33(b), to correct the inventorship that identifies the named inventor or inventor's being deleted and acknowledges that the inventor's invention is no longer being claimed in the nonprovisional application; and

(2) The processing fee set forth in § 1.17(i).

We request the following inventors be deleted from the present application:

Pamela Geddes

Barry Marginean

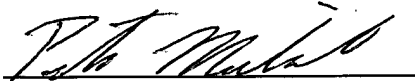

Barry Briggs

We acknowledge that these inventor's inventions are no longer being claimed in the present nonprovisional application. The commissioner is hereby authorized to charge the required processing fee set forth in § 1.17(i) to deposit account 50-2753.

To the extend necessary, please charge any shortage in fees due in connection with the filing of this paper, including extension of time fees, to Deposit Account 50-2753 and credit any excess fees to such deposit account. If

necessary, a petition for an extension of time under 37 C.F.R. 1.136 is hereby made.

Respectfully submitted,
Howard J. Greenwald P.C.
